

## THE SAMATHA TRUST

### *Statement on climate and the environment*

**The Trustees' view is that all of us in Samatha should act as skilfully as we can to reduce negative effects on the environment from our organisation's activities, while maintaining our primary focus on the provision of facilities and support for practice.**

In relation to the land, we reaffirm our long-term intention for a significant proportion of the land at Greenstreete to become a nature reserve with a range of habitats and diversity of flora and fauna appropriate to the area and the conditions.

Meanwhile, we encourage the Management Group to promote awareness of this position amongst all those who use our facilities and to make it as easy as is reasonably practicable for them to support it and to apply it in the day-to-day operation of Greenstreete and elsewhere.
